

*Vision 2020/2015* -A Note on Process

When the Planning Board proposed to revisit the *Vision 2020* document, the intent was to assess the town's progress on the goals of the Vision. We collected comment from the advisory boards. The *Vision 2020* document, given the breadth of subject it engages, is admirably brief, concise and aspirational. We adopted the tone, brevity and generality of the original. We edited the collected comment to that end. We devised a format that shows the new comment below the original. Our goal was readability. We were pleased that so many of the boards commented on aspects of town life beyond the purview of the particular advisory board.

The draft presented to you earlier this year has been expanded by additional comment. This version is an even broader vision.

The Planning Board
